# PPH 2025 STATE OF THE ART

A world-class summit, which aims to facilitate dynamic discussions and state of the art presentations on the topic of Post Partum Hemorrhage

Each year, millions of women experience postpartum haemorrhage (PPH), commonly defined as a blood loss of 500 ml or more within 24 hours after birth. This preventable and treatable condition remains the leading cause of maternal death worldwide, despite decades of work and proven lifesaving interventions.

*Quote: WHO Roadmap to combat postpartum hemorrhage between 2023 and 2030*

## Confirmed referents:

Regula Aeberli-Zurich, Francesco D'Antonio-Chieti, Sina Coldewey-Zurich, Ioannis Gallos—WHO/Birmingham, Thierry Girard-Basel, Dena Goffman-New York, Wolfgang Henrich-Berlin, Justus Hofmeyr-Botswana, Alexander Ioscochich Jerusalem, Christian Haslinger-Zurich, Wolfgang Korte-St. Gallen, Su Mon Latt-London, Nicole Ochsenbein-Zurich, José Palacios-Jaraquemada—Buenos Aires, Gilbert Dominique Puipe-Zurich, Lena Have Rosvig-Aarhus, Georges Savoldelli-Genève, Loic Sentilhes-Bordeaux, Michèle Stahel-Zurich, Daniel Surbek-Bern, Katharina von Weizsäcker-Médecins Sans Frontières,

*Save the date*

Please note that the **congress language will be English**

## ZÜRICH INTERNATIONAL SYMPOSIUM ON

## POST PARTUM HEMORRHAGE OCTOBER 24-25, 2025

Department of Obstetrics

08.00-10.00 Diagnosis of PAS in the 1st and 2nd trimester and Management of Cesarean Scar Pregnancies

*Prof. Francesco D'Antonio*

Use of REBOA (Resuscitative Endovascular Balloon Occlusion of the Aorta) in women with PAS

*Prof. Alexander Ioscovich*

Embolization of the pelvic arteries - indications, limits and long-term outcomes

*PD Gilbert Dominique Puippe*

10.30-12.30 Conservative Management PAS

*Prof. Loic Sentilhes*

Preoperative Assessment and Surgical Management of PAS: Hysterectomy or 1-step conservative surgery?

*Prof. José Palacios-Jaraquemada*

Cesarean Hysterectomy due to severe Placenta Percreta - preoperative preparation and management at USZ

*Prof. Nicole Ochsenbein*

13.30-15.30 Uterine packing with chitosan-covered tamponade (Celox®)

*Prof. Wolfgang Henrich*

Jada®, An Intrauterine, Vacuum-Induced Hemorrhage-Control Device for Treatment of Severe PPH - Experiences from the US

*Prof. Dena Goffman*

Vacuum-Induced tamponade using modified Bakri®-balloon or urological catheters

*Prof. Christian Haslinger*

Time to test tamponade - but how? Experiences from a first suction tube randomized controlled feasibility trial

*Prof. Justus Hofmeyr*

16.00-18.00 WHO Perspective on the burden of PPH: outlook and the WHO-Roadmap to combat PPH

*Prof. Ioannis Gallos*

PPH in resource-poor settings and Experiences from the E-MOTIVE Trial - what is needed to save lives?

*Prof. Justus Hofmeyr*

Management of Obstetric Hemorrhage in conflict zones

*Dr. Katharina von Weizsäcker—Médecins Sans Frontières*

08.00-10.00 Role of rFVII - time for implementation or time for trials?

*Prof. Daniel Surbek*

Role of Fibrinogen, FXIII and platelets in PPH and peripartum change of coagulation factors - new insights into an old problem

*Prof. Wolfgang Korte*

Anesthetic management of severe PPH: Patient blood management, setting, red flags and complications

*Prof. Thierry Girard*

PPH from an anesthetist's perspective - special cases from everyday practice

*Prof. Sina M. Coldewey*

Anesthesia management for placenta accreta spectrum

*Prof. Georges Savoldelli*

10.30-12.30 It's all about the team - Communication is key

*Regula Aeberli / KD Dr. Michèle Stahel*

Video-assisted debriefing after severe PPH - (how) does it work?

Patient Perspective During PPH: Short- and Long-term Consequences

*Dr. Lena Have Rosvig*

PPH and risk of cardiovascular disease in later - what could (should) be done?

*Dr. Su Mon Latt*
